Lakshya Vashishtha

B.Tech CSE Student | MERN Stack Developer

Jaipur, India | [your email] | [your phone] | [GitHub URL] | [LinkedIn URL]

Summary

Computer Science undergraduate building full-stack web applications with the MERN stack, with additional experience in Python-based statistical analysis and optimization research.

Education

B.Tech, Computer Science & Engineering

JK Lakshmipat University, Jaipur | [start year] - present

Experience

PS-1 Internship (Research)

Supervised by Dr. Ashish Jain, JK Lakshmipat University

- Comparing discrete metaheuristic algorithms (D-GWO, D-PSO, D-CS, D-COA) on Traveling Salesman Problem benchmarks from TSPLIB, for a conference paper in preparation.
- Implemented the Discrete Grey Wolf Optimizer with 2-opt local search in Python.

Projects

LeetCode Clone (MERN)

- Coding practice platform built on MongoDB, Express, React and Node.js.
- Built a custom code executor on Node.js child_process after third-party judge services were unavailable.

Food Delivery App (React)

- Restaurant browsing app using React 19, React Router v7, Redux Toolkit and Tailwind CSS v4; deployed on Netlify.

Metaheuristics for TSP (Python)

- Comparative study of discrete metaheuristics on the ATT48 benchmark and related TSPLIB instances.

Skills

Frontend: React, React Router, Redux Toolkit, Tailwind CSS, JavaScript, HTML, CSS

Backend: Node.js, Express.js, MongoDB, Mongoose, REST APIs

Tools: Git, GitHub, MongoDB Atlas, Netlify, Python
